FOR IMMEDIATE RELEASE

Crest Audio® Unveils CPL™ T Series of 2-Way Ceiling Speakers

MERIDIAN, MS — Crest Audio®, a Peavey Commercial Audio® brand, unveils the CPL™ T Series of ceiling speakers. Offering an elegant, discreet package, low-recessed profile, and widely distributed audio coverage, the CPL T Series is equipped for system designers and architects, delivering on the aesthetics and high-performance needed for ceiling-mounted enclosures.

The CPL T Series includes three models of two-way flush-mounting speakers with backcans, and are suitable for a wide range of applications. The CPL 4T is equipped with a 4-inch woofer at 40W of continuous power handling; the CPL 6T with a 6.5-inch at 50W; and the CPL 8T with an 8-inch at 90W. Each speaker has a one-inch soft dome tweeter with titanium membrane, which can be aimed towards the listening area.

A five-step Tap selectable switch, located at the speaker face and behind the front grill, allows for easy adjustment of the CPL T Series before and after installation, for both 70V or 100V Hi-Z distributed speaker lines and up to 90W selectable, depending on the model. For Lo-Z speaker connectivity, an 8 Ohm transformer bypass setting is included for maximum versatility.

Good sound quality starts with reliable construction, and the CPL T Series delivers with a high-impact injection-molded plastic. The units are housed in a steel fire-rated backcan with a 4-pin screw terminal that allows for easy daisy-chain wiring terminations. Integrators will find the CPL T Series quick and easy to install. Furthermore, the magnetically attached front grill arrives in a white finish, but can be painted to suit any interior as needed.

Delivering high-quality components in an unobtrusive enclosure, the CPL T Series of ceiling speakers are ideal for a variety of settings.
